FOR IMMEDIATE RELEASE

ImageScan to Present & Exhibit at Fusion 2011
Company to Showcase How Banks Can Increase Customer Loyalty
by Building "Stickier" Customer Relationships

LANHAM, Maryland, April 28, 2011 – ImageScan Inc., a U.S.-based, leading software solutions provider for accounts receivables management and transactional content unification, will exhibit in Booth 1200 at Fusion 2011 in Orlando-Kissimmee, Florida on May 9-12, 2011. At this premier forum for financial operations professionals, ImageScan will demonstrate *TCM Unify®*, its transactional content management unification solution, and will highlight its core capabilities – Integrated Client Site Capture, Redaction/Encryption, and Multibank – that reward customers with tighter information control and more secure transactions.

On Thursday, May 12, 2011, ImageScan, in concert with M&T Bank, will present an educational breakout session at 8:30 a.m. The session, titled *Optimizing Business Intelligence: Meeting Client Expectations and Breaking Down Information Silos*, will examine how organizations that process large volumes of payments must respond to changing market conditions by improving their capabilities. These organizations must invest in more intelligent and adaptable payment processing infrastructure – or cede the business advantages provided by doing so. During the hour-long presentation, the speakers will identify business challenges and what constitutes a solution to overcome these environmental and market challenges. The speakers will share how organizations can benefit from a single point of integration for payments and other content captured from multiple sources, as well as how to avoid "rip and replace" of existing systems. The audience will learn how technology can be leveraged to aggregate payment transactions from multiple systems for accurate posting, reporting and archive delivery.
